To whom it may concern,

I would like to take this time to tell you about the first waste management system ever built into our restaurant. The pioneer of this equipment did the installation himself. Since the installation, the compaction system has cut our waste hauling cost from a monthly rate of \$900 down to \$242. In the first twelve years, we realized a savings of \$94,752. The system has eliminated back door pilferage and the need for dumpsters. It is an environmentally clean and safe way to dispose of our waste.

GTS has developed the next level in a waste handling system. We highly recommend the equipment. If building a new restaurant today, we definitely would install a GTS 1000. Our experience with our trouble free 1990 installation insures us this is indeed the next level of waste control.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mark Hultgren".
